okti™
Simply, done right.
Portable & LTM EEG.

Okti is the culmination of decades of experience in EEG monitoring and deep understanding of patient care .

Okti synthesises the needs of the EMU, offering the latest in enterprise wireless technologies in a compact, user-friendly and modular configuration so as the needs of the EMU changes, Okti can adapt.

System Highlights

Compact, wireless and portable EEG recorder system for long term epilepsy monitoring.

Reconfigurable modules for 32, 64, 128 Channel electrode headcap system.

Multiple units can be tethered to provide larger connections, up to 512 Channels.

Disposable Ambulatory Packs

- Robust Tyvek® construction
- Splash resistant
- Helps with infection control

Adult Waist Pack

Broad waist band gives ample support and flexibility to move around waist and remove pack.

Child Back Pack

Distributes load more effectively for children, whilst still giving them the freedom to play. Pattern design is playful and fun, easing the anxiety of the process.
